This is called a corset and was popular during the 1800's.

It would create an appearance of a thin waist by tightening.

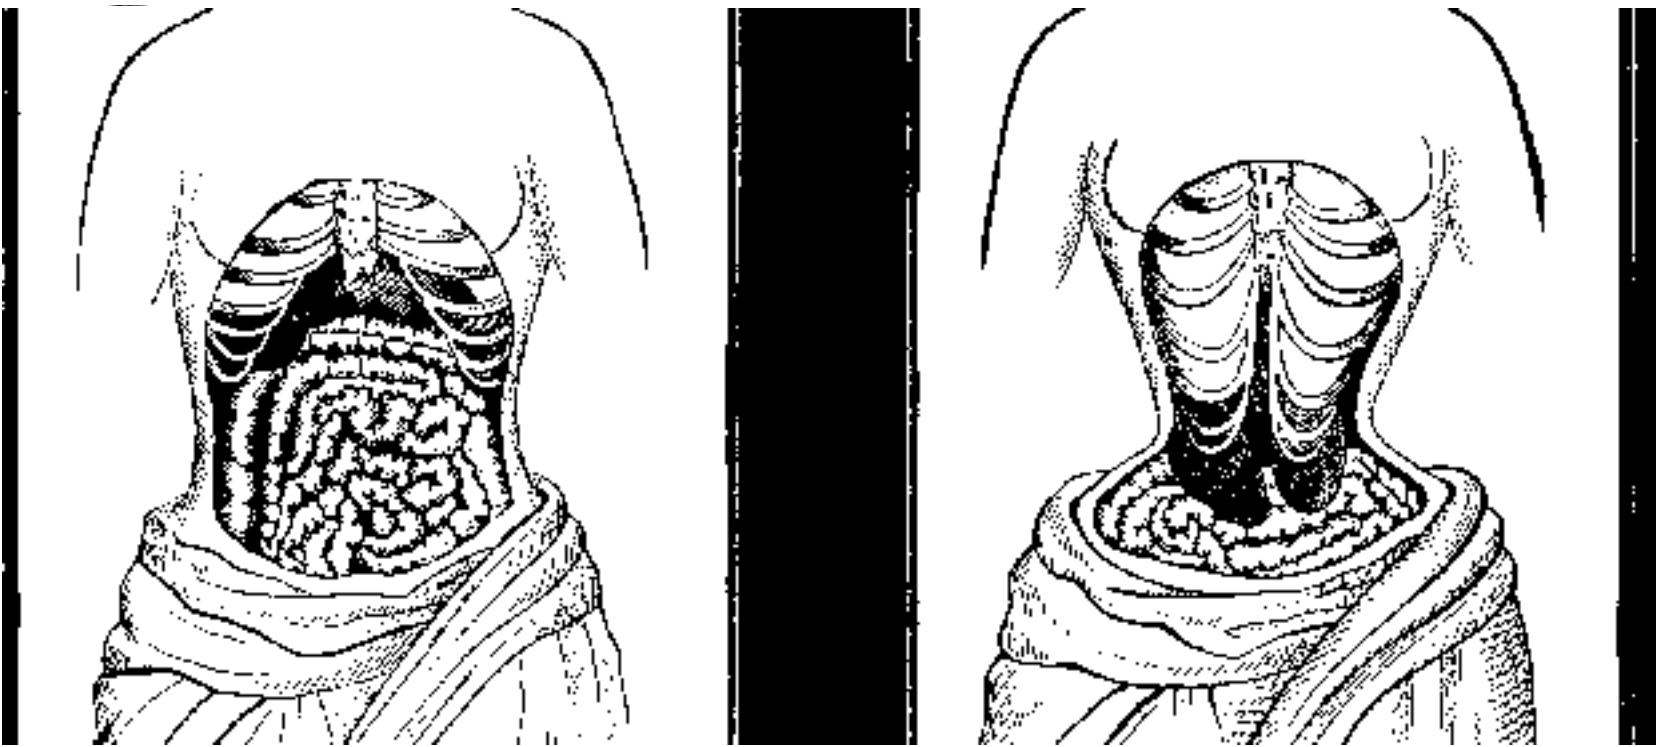

Why do you think this would have been fashionable back then?

Do you think it was attractive to men or do you think women prefer to wear this?

If these corsets were only available to wealthy women do you think it was a sign of wealth not of beauty?

Do you think this would come back in fashion some time in the future?
